

The Little Gloucester

OAKWRIGHTS®

The Little Gloucester is a scaled-down version of the Gloucester room over garage, with smaller bays and smaller timber sections this provides a slightly more cost-effective oak 'room-over garage' that compares in size to many of the smaller room-over buildings provided by our competitors. A very usable room above is provided with a number of potential uses. It could become a simple loft store or be fully fitted out to provide a home office, gym, games room or even additional guest accommodation space.

Full Assembly by our Expert Team

- Oak frame kit assembled by our friendly team
- Choice of roof tiles, guttering, felt and battens
